Trees of the Inland Northwest:

# Ponderosa Pine Field Day

INFORMATION AND REGISTRATION

Turnbull National Wildlife Refuge,  
Sept. 10, 2011

WASHINGTON STATE UNIVERSITY  
EXTENSION

**T**he **Ponderosa Pine Field Day** will be a chance to focus on one of, if not, the most important tree species of the Inland Northwest, *Pinus ponderosa*. Open to the public, this field day at the **Turnbull National Wildlife Refuge** (NWR) in Cheney, WA, will highlight the “web of life” surrounding a key species of the Inland Northwest.

Held in conjunction with the annual summer tour of the **Washington Farm Forestry Association (Spokane Chapter)**, this is the first of a series of field tours highlighting the tree species of the Inland Northwest.

Whether you have ponderosa pine on your property or just want to know more about it, this will be a great opportunity to get outside and interact with experts and other landowners.

Evidence of fire on several old ponderosa.

# Ponderosa Pine Field Day

## Topics of the tour will include:

(Agenda subject to change)

- How has the natural history of this area shaped these forests?
- The life history of ponderosa pine, from seed to snag (or board). What other species are associated with this forest type?
- Ponderosa pine is host to a number of key forest insects and diseases. What are they and how can we improve the resiliency of these forests?
- These forests provide habitat for many species of wildlife. What are some key species and associated management strategies in ponderosa pine forests?
- The Turnbull NWR has an active fire program, utilizing fire as a management tool. What is the fire history of ponderosa pine ecosystems and what are the benefits of using fire in Turnbull NWR management?

**Registration for the field day is \$10/person or family.** Space is limited so register early. We'll be in the field so bring a lunch, a lawn chair, and dress appropriately. The program (Saturday, Sept. 10<sup>th</sup>, 2011) will begin at 8:30 am at the Turnbull NWR visitor center. The visitor center is south of Cheney, approximately 5mi along S. Cheney Plaza Rd, then east 2mi along S. Smith Rd.

**For information contact:** Erik Sjoquist, WSU Extension; 509-477-2048 or erik.sjoquist@wsu.edu

*Ponderosa pine is the most widely distributed species of pine in the United States.*
